## PITAGONE F11 & F18 MOBILE HOSTILE VEHICLE MITIGATION BARRIERS

ARX Perimeters is the exclusive distributor of Pitagone Mobile Hostile Vehicle Mitigation (HVM) barriers in the United States. The Pitagone HVM barriers are a lightweight, unique and mobile solution designed to protect people, places and things against intentional or inadvertent vehicle ramming attacks.

These mobile barriers can be set up in less than 5 minutes by one person and does not require any tools. They are the only crash certified mobile solution tested with the wheels on the barrier. The integrated wheels on each barrier allows for immediate vehicle access. Pitagone HVM is a modular system, meaning the barriers can connect to each other to provide unlimited protected coverage.
