

# Take Shelter. Hunker Down. Keep Safe.

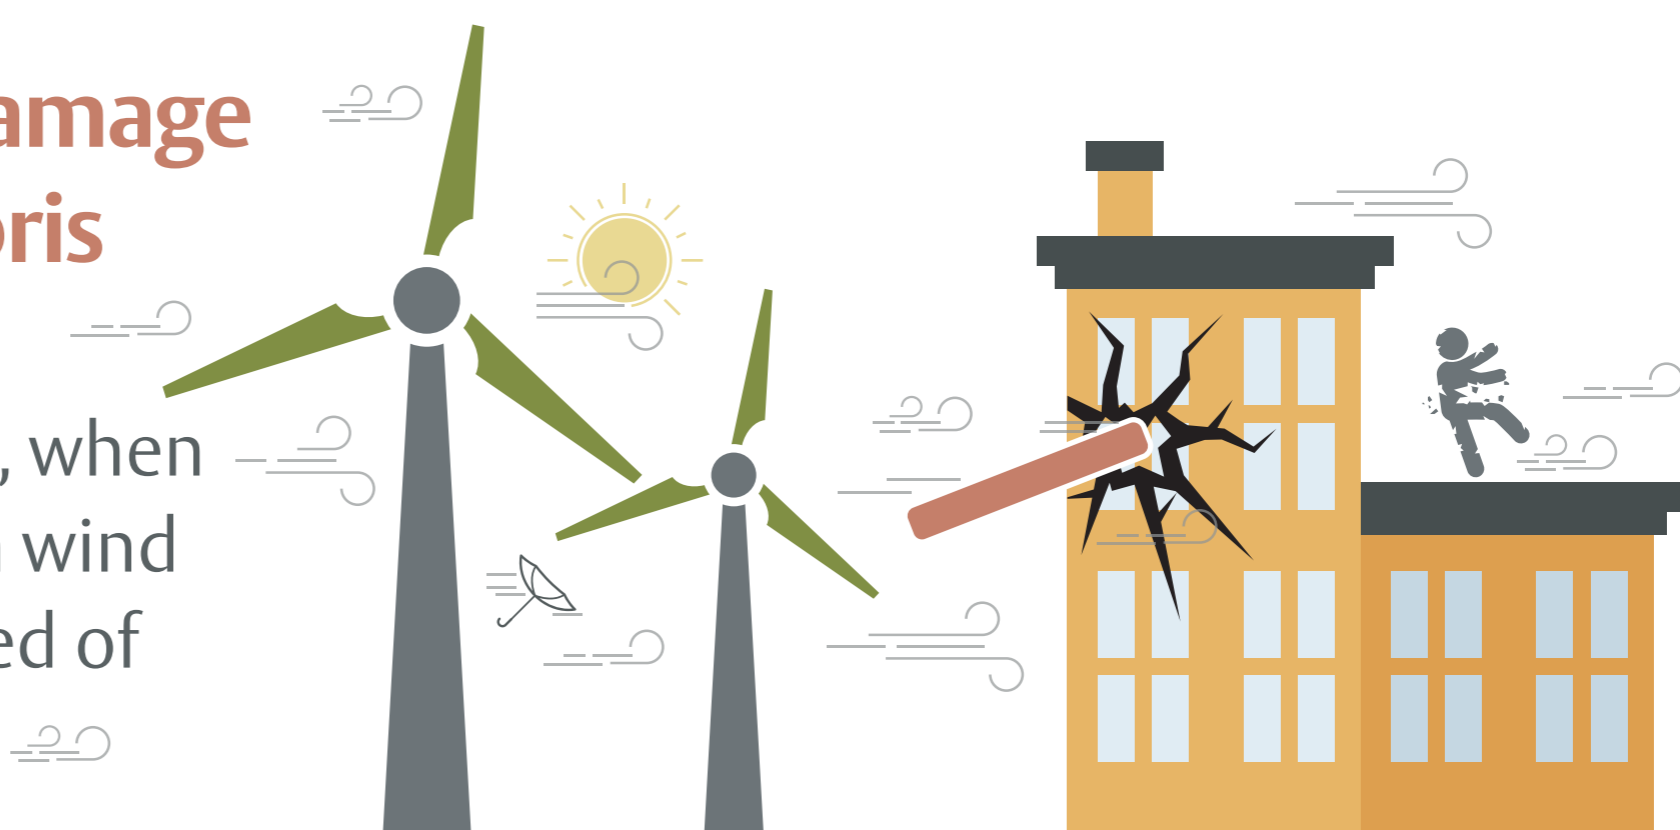

Don't Let the Wrath of Tornadoes Injure You or Your Colleagues.

**Our Tornado Resistant doors** were developed to resist windborne missiles and flying debris associated with tornadoes, and designed specifically for shelters to protect occupants from injury.

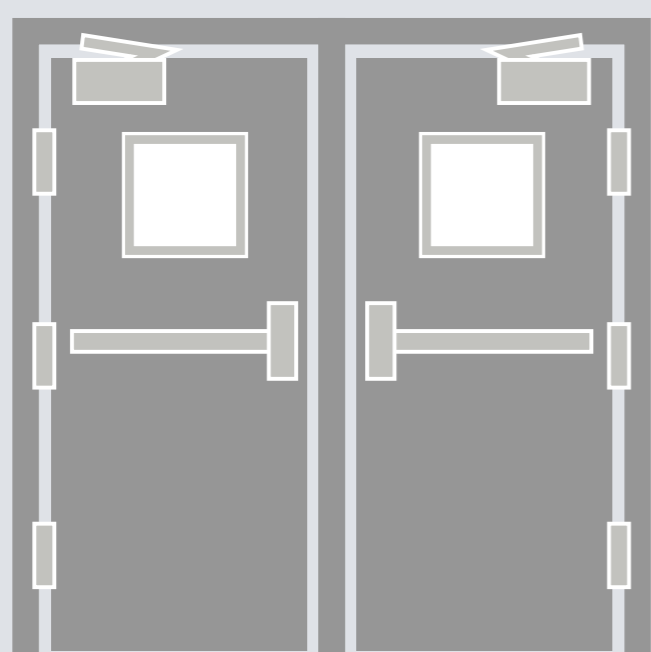

## Consider This Damage From Flying Debris

A 2"x 4" wood stud weighing 15 pounds, when carried by a 250mph wind has a horizontal speed of 100mph.

**That's enough force to penetrate most common building materials today.**

## When It's Stormy Out, You Need StormPro

**StormPro 361 and StormPro 320** — assemblies have been successfully tested in accordance with ICC 500-2014, and 3rd party UL classified to ICC 500-2014 standards.

**StormPro Tornado Shutter** — designed for safe rooms that require natural lighting from windows during normal, non-threatening conditions and are 3rd party UL tested and classified to ICC 500-2014 and meets FEMA guidelines.

**Available with Fire Rated Glazing** —

- 10"x10" Visible factory installed glass
- Glazing available on all assemblies with 3-sided frames
- 90 minute UL fire rating option
