

STALWART PLUS®

ANTI-RAM BARRIER + ARCHITECTURAL MESH

Stalwart Plus combines the design components of an *anti-ram barrier* with the *industrial appearance of architectural mesh*. Stalwart Plus unites the strengths of its framework with diverse mesh options for a *varied level of security to delay with anti-cut and anti-climb properties*.

DESIGN INTEGRATION

The Stalwart Plus framework is a raceway for wiring, conduits, and/or security cabling required around the perimeter of a project. This integrated design eliminates the need for costly trenching and boring becoming a value added solution for perimeter security upgrades.

(inside of rail shown / view from protected side)

When installing these security elements use Stalwart Plus as a platform:

- **Communication & Video Cables**
- **Intrusion Detection / Fiber Optic Cables**
- **Access Control Wiring**
- **Conduits**
- **Anti-Ram Cabling (Stalwart)**

PRIMARY APPLICATIONS

- **Power Plants & Substations**
- **Petroleum & Chemical Facilities**
- **Water Treatment & Storage**
- **Military Sites**
- **Government Facilities**
- **Ports of Entry**
- **Airports**
- **Railways**

FABRICATION & DESIGN

The Stalwart Plus framework is manufactured of high-tensile steel and is pre-galvanized inside and out for superior corrosion protection. Stalwart Plus is designed to be fitted with a filler that best matches the level of security required. Each mesh filler has a unique characteristic that provides a specific level of anti-climb and anti-cut properties for the highest level of delay and visual deterrent.

PERMACOAT™ PROTECTIVE FINISH

Ameristar's production facility uses a state-of-the-art polyester powder coating system that provides a durable and scratch resistant finish. This PermaCoat process has a dual-coat finish, which yields the best results for durability and weathering in the industry. These finished components can endure over 3,500 hours of salt spray testing; proving our claim of long-lasting durability.

CRASH RATINGS

Stalwart Plus offers multiple anti-ram ratings. Each installation can be designed with most the appropriate stand-off distance from the assets.
