

PORTABLE, MODULAR, PROVEN PROTECTION

### FEATURES

- Ballistic & Blast Tested
- Equivalent to UL752 Level 10
- Steel Construction
- Venetian Style Air Flow Design
- Replaceable Armament
- Portable/Relocatable
- Corrosion Protection Options
- Final Paint Finish Options
- Flexible Designs

### SYSTEM OVERVIEW

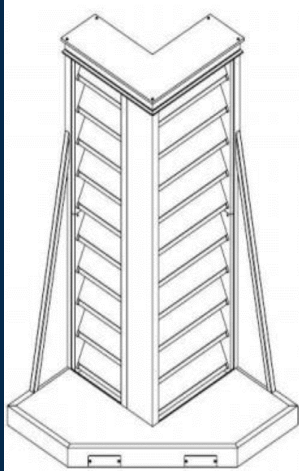

The Ironside Protective Wall System is a portable perimeter protection solution ideal for use on commercial, industrial or government critical infrastructure facilities. It's modular design allows for adaptability to most perimeter security application. Ironside successfully stopped numerous .50 caliber rounds at a distance of 20 feet and sustained a 5-pound C4 explosive detonation with only minor cosmetic damage. Each section can be placed into position by a forklift or crane.

### APPLICATIONS

The Ironside Protective Wall System is the ideal solution for both permanent and temporary security applications.

<u>Government</u>	<u>Commercial</u>	<u>Infrastructure</u>	<u>Specialized</u>
DOD Installations	Petro-Chem	Substations	Port Authorities
Federal Agencies	Data Centers	Nuclear	Temporary

### CORNER UNIT

Width: 7 feet  
Height: 12 Feet  
Weight: 6,000 lbs.

### A-FRAME

Width: 4 feet  
Height: 7 Feet  
Weight: 6,000 lbs.  
Optional: 54-inch top panel available.

### Ballistic Test

- ✓ 7.62 x 39mm (AK47) from 50 Feet with 40+ Shots
- ✓ .30 Caliber M2 AP from 20 Feet with 5 Shots
