BARRIERS

Range of road barriers

Be ahead

The innovative technology that gives you more power

An absolute innovation, and Bft exclusive, with surprising new-generation performance: U-Link is a cross-platform that allows the creation of technological ecosystems, offering maximum control.

- **U-Control** A new Android App that, in just a few simple steps, shows the potential of U-SDK in the service and commercial sector.
- **U-Base 2** facilitates the management of a system interconnected via U-Link, allowing you to control the automation parameters.
- **U-SDK** the system integrators can make other brands of home automation systems dialogue with Bft products interconnected in a U-link network.

New power in *your* hands.

B-eba

A direct line with your operators.

B-eba expansion cards allow the connection of external devices, such as PCs, smartphones and tablets, to a Bft operator or Clonix receiver, or the connection of several Bft products in a U-Link network. These accessories integrate with U-Link technology and Bluetooth, Z-Wave, Tcp/Ip protocols, as well as the RS485 serial connection.

A device that fully translates what Bft intends as interconnectivity.

Clonix U-link

Allows the connection of old-generation products or non-Bft products to U-Link systems.

Old-generation Bft operators or a product belonging to other brands: can they be connected to U-link? Yes, thanks to the Clonix receivers. Accessories that know no limits.

MAXIMA ULTRA

Automatic barrier for very intensive/continuous use.

- Range of professional 230 Vac electromechanical barriers with three-phase induction motor with inverter for intensive use. Designed and developed to operate in a wide variety of conditions such as large car parks, busy motorway toll-gates, industrial installations. Possibility of setting the useful passage from electronic control unit. Mechanical movement with connecting rod-crank mechanism ensuring smooth movement of the boom, while managing slowdown in opening and closing. The same mechanism can ensure high anti-vandal protection for the gearmotor. Equipped with U-Link protocol, they allow integration in Parking Management or Building Management systems
- Available in versions with or without spring (SM) fitted inside

- U-Link
- rolling code
- Oil Gear
- Encoder
- inverter
- Block
- tri

FEATURES

- Three-phase induction motor
- Control unit compatible with U-Link
- Anti-vandal protection with connecting rod-crank system

MICHELANGELO

Automatic barrier for intensive use.

- Range of barriers for intensive use, able to manage useful passages of up to 8 m.
The wide range of accessories, incorporated flashing light and the arrangement for installing photocells make them ideal in any context.
- Central control unit with U-Link, programming display and incorporated two-channel radio receiver fitted in the top of the unit for easier access.
- Limit switch system with electronic adjustment that speeds up installation and ensures maximum precision of movement.
- Backup battery power supply system, installable on-board unit.
- IP54 protection rating

- U-Link

GIOTTO

Electromechanical barrier for intensive use.

- Range of barriers for intensive use, able to manage useful passages up to 6 m. Equipped with 24Vdc motors, they have a wide range of accessories making them ideal in any context.
- Scenario programming: the MERAK BG control units enable extremely rapid and precise installations thanks to the scenario programming of the installation. In fact, with just a few choices made on the display it is possible to program the control unit completely, saving time and ensuring the best results.
- Control unit in upper position: the control unit located at the top of the barrier and protected by a solid aluminium housing enables connection, programming and maintenance operations to be performed with maximum ease and convenience.

TWIN

24V chain barrier for access points up to 16 m

“TWIN” 24 Vdc automatic chain barrier for intensive use, suitable for delimiting accesses to residential and industrial areas and small private car parks with entry points up to 16 m.
The exclusive cap with traffic lights (in TWIN LIGHT version) and buzzer facilitates entry and exit.
Very durable, cataphoresis treated and painted steel structure, “TWIN” is an excellent and safe solution for protecting public and private areas, thanks to an “encoder” reverse motion system, and integrates perfectly with the urban environment.

- Available in versions with and without cap with traffic lights

Team up with us: be ahead!

Advanced solutions, with unique and exclusive features. But also simple, accessible, and close to people. Next-generation technologies designed to improve the lives of all: installers and those who use them.

This is us today: a company focused on the needs of the present, with an eye to the future. A professional and understanding company, able to take its partners by the arm and, thanks to a full access specialist approach, make them proceed at that dynamic pace allowing them to always be in the forefront. A company where the technical component is supported by the power of passion, and where engineering expertise is completed by the brilliance of lively inventiveness. Because we like to listen to you, understand you, address your needs and offer new opportunities; always giving you the best, with increasingly sophisticated tools designed to enhance performance. A fast and smart technology, always accelerating: to advance the pace of innovation and, together with you, always be a step ahead.

Be ahead
