About G.G. Defense Systems Ltd.

- Founded in 2007, our company offers solutions for various defense and HLS threats from blast mitigation to ballistic protection, from simple vandalism crimes to massive terrorist attacks.
- Our company provides solutions for complex protection applications, combining experience in force protection solutions and an extensive knowledge of materials and technologies.
- Our range of products and solutions comprise also light composite ballistic panels, personal protective plates and bullet-proof body armor.

Our Clients

Security Doors

Ballistic/Blast/Forced Entry Rated Doors

G.G. Defense Forced Protection Doors bring a unique, cutting edge door system which differs from any other product in the market today.

Our doors rely on uniquely developed components that act in synergy, strengthening and supporting each other to create esthetic doors that meet the highest security requirements.

Available in a wide range of designs, fit to accommodate client requirements, combining, when required, forced entry, blast and ballistic resistance up to the highest levels using unique, light-weight composite transparent or opaque armor.

Security Doors

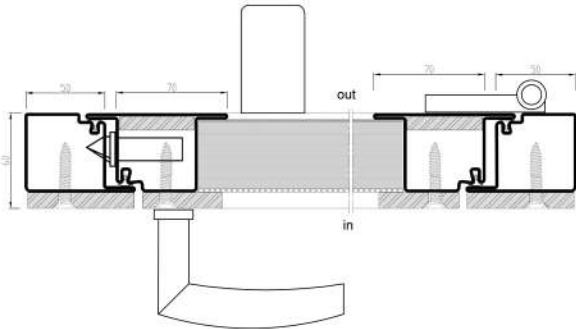

Technical details
