

April 14, 2017

To whom it may concern:

This letter is to certify that the subject barrier, the G-6532 M30 P2 Modular Vehicle Barrier, provided by Gibraltar, was tested to the requirements of the ASTM standard F-2656-07, Standard Test Method for Vehicle Crash Testing of Perimeter Barriers, in place when the test was performed.

The test was performed at Calspan Corporation on March 1st, 2017. The barrier was impacted by a truck weighing 6751.8 kg (14,885 lbs.) travelling at 29.52 mph (47.50 kph). Post-test measurements of the static position of the test vehicle's payload (truck bed) with respect to the trailing edge of the impacted element show that the left and right leading edge of the truck bed was stopped at 6.485 meters and 6.705 meters, respectively. As such, based on the truck mass, impact velocity and penetration into the protected zone, the barrier rating per the ASTM standard F-2656-07 is M30-P2.

Calspan is accredited to ISO 17025 to perform ASTM F2656-07 testing by Perry Johnson Laboratories Accreditation, Inc. (PJLA) under Certificate Number L13-137 and Accreditation Number 76654.

Respectfully,

Edward Dutton Test Director
