

# Modular Environmental Enclosure

Kontek continues to innovate to support our nation's security, health and safety needs. The Kontek Environmental Enclosure is a fully modular solution adaptable for health & education facilities, law enforcement departments, military and critical infrastructure installations. Kontek's Environmental Enclosure is designed to provide protection from the elements as well as social proximity standards to better protect and prepare your facility and staff.

## Features:

- Modular, easy to setup design with camlock system
- Lightweight, wind & weather rated foamed insulated panels
- Capable of withstanding elements with weatherproof design

- Stainless Steel and/or Aluminum

## Flooring Options available

- Mobile or static enclosures available
- Options available for HVAC system, ventilation, generators/backup power

## Benefits:

- Cost effective design provides low cost of ownership and minimal preventative maintenance
- Provides protection from weathering elements and creates modular static isolation zones
- Provides operational flexibility for both permanent and temporary use
- Allows for continued environmental protection and preparedness while site operations remain active
- The system can be quickly assembled and disassembled; simplicity is at the core of the design
