

EntraQuick PU30 - ultimate security for vehicle access points

The innovative EntraQuick PU30 offers all the advantages of a Quick Folding Gate and a crash tested arrestor system for additional impact resistance and maximum protection.

EntraQuick PU30

The Quick Folding Gate EntraQuick PU30 is based on the proven design of the single leaf EntraQuick II. Advantages here are a fast operation time and obstacle free passage due to the lack of bottom and top rail guides. Its high reliability and low maintenance make it the ideal solution for high frequency access routes with high security requirements.

The active arrestor system is designed to effectively prevent forced entry of vehicles up to the size of a pickup truck (2.5t) travelling at 48km/h. The EntraQuick PU30 is crash tested and has the following certifications:

PAS 68 V/2500[N1G]/48/90/1.2/0.0

IWA 14-1 V/2500[N1G]/48/90/1.3
