RAMPART

WELDED WIRE SERIES

W

WALLACE
PERIMETER SECURITY

RAMPART 286 panels are aesthetically attractive and a cost-efficient alternative to traditional ornamental fencing. The special 3D technique ensures that in spite of its limited weight, this profiled panel is still astoundingly stable.
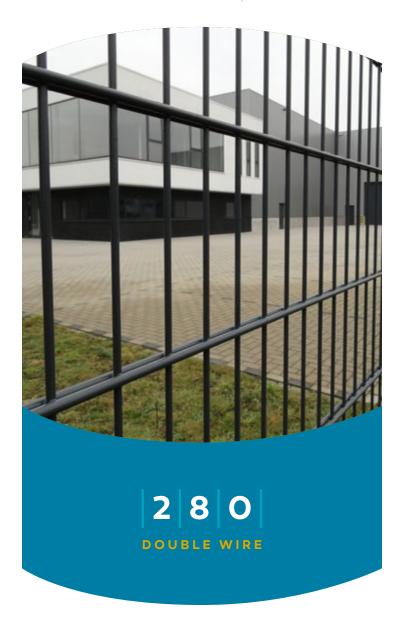

RAMPART
WELDED WIRE

When it comes to form and function Rampart Welded Wire has you secured. Cutting through welded mesh is time-consuming and difficult. Rampart Welded Wire adds beauty and elegance to every property it protects.

SINGLE WIRE

**RAMPART 284** panels are a great entry-level, double wire fence system and the perfect solution to address the drawbacks associated with chain link fence. The strong and rigid panel offers a stable and cost-effective solution for absolute security.

RAMPART 280 panels combine beauty with our strongest double wire panel. The welding of the wire interfaces are intended for intense security use and made to resist the onslaught of even the most motivated trespassers.

DOUBLE WIRE

RAMPART 358 panels provide
an extraordinary high security solution.
The small mesh openings make it nearly impossible
to scale and very difficult to cut.

RAMPART 354 panels provide the highest level
of security. The small mesh size combined with
additional horizontal double wires ensure
a strong and rigid panel.
